Germany

Professional Bindery Quality

# **COPY** BINDER

Turn your copied and printed projects into professional-looking, high quality documents in no time. Precise. Clean. Solid.

## Required:

The Copy Binder, Planax Copy Strips, and the cooling tray.

With its outstanding processing capabilities, simple operation, and economically priced materials the Copy Binder is the ideal solution for offices, copy shops, tax consultants, auditors, etc.

## Benefits:

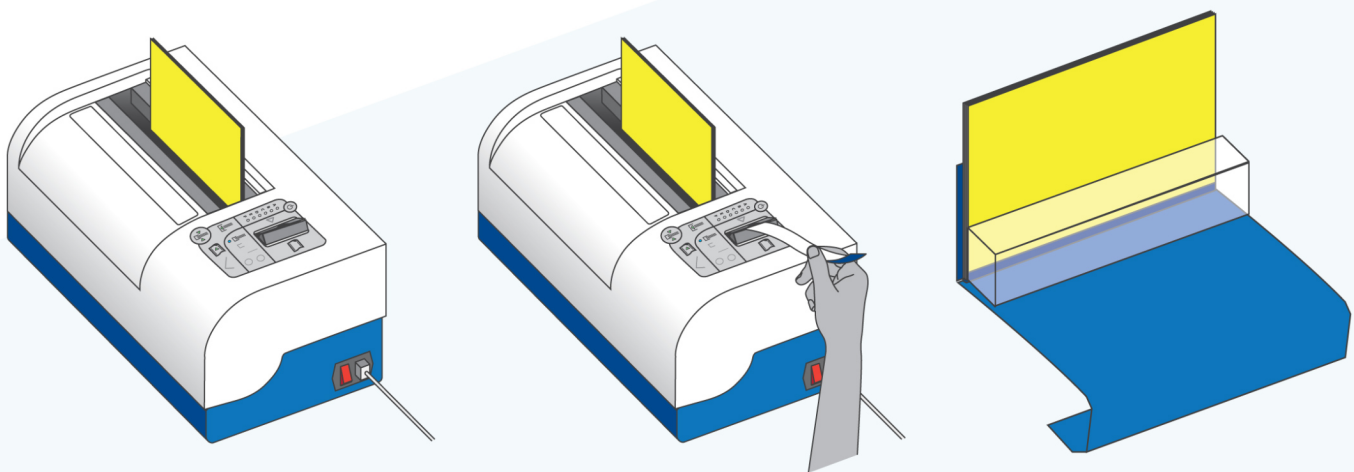

- Compact design and easy handling
- Perfect for binding jobs of 5 to 330 sheets (excluding covers)
- Fast, precise, and neat processing
- Perfectly flush edges for a professional look
- Finished projects lay flat when open for optimal readability
- Extremely durable and stable binding
- Finished projects are easily stacked for storage
- Compact finished projects- great for envelopes and other mailing options

**PLANAX**

Fast and easy binding in 3 simple steps

- 1

Insert flushed paper stack.  
Strip width displayed on machine.
- 2

Insert Planax strip.  
Binding process begins.
- 3

Take bound product and  
place in cooling tray. Done!

	White

**NEW:**  
Fully Customizable  
Copy Strips

**My COPY STRIPS**

Create your own Copy Strips made to your exact design  
(e.g. your company logo). It is also possible to use a wide  
variety of colors, patterns, and fonts. You are only limited  
by your own creativity!

## Optimal processing

# **COPY** JOGGER

Through ventilation and vibration the Copy Jogger is able to square up the edges of a paper stack to properly and precisely prepare it for the Copy Binder.

Before feeding paper into printing, binding, folding, enveloping or other machines, the stacks of paper must be perfectly aligned so as to accomplish the best result. Therefore, PLANAX has made the Copy Jogger. This device prepares projects ready for binding (or any of the above mentioned tasks) with 100% precision, guaranteeing a problem-free result.

- A continuous dial allows you to select the precise strength of vibration
- The jogging box holds paper stacks of up to 1,000 sheets of DIN A4
- The adjustable box panels also allow for the processing of thin stacks of paper
- Adaptable for paper stacks and sizes larger than DIN A4

## **COPY** SILICONE OIL

Keep your device running smoothly by regularly oiling the spindles and bearings. This prevents the sticking of adhesives and creates a protective film on the cutting components.

## **COPY** CLEANER

Keep all of your PLANAX devices clean by removing any excess adhesive residues, dirt, or dust with this versatile cleaner.

Specially designed for  
**COPY** BINDER
